

# A Message from Your Neighbor Watch Coordinator

**eCAP**

**eMail Community Alert Program**  
For the City of Cupertino

## What is eCAP?

The purpose of the Email Community Alert Program is to electronically notify Cupertino residents of crimes that have occurred in their own neighborhoods. The eCAP messages are sent out weekly to prevent and reduce crime by:

- Raising community awareness
- Minimizing opportunities for crime
- Increasing the possibility of solving crimes with the public's help

## How does the program work?

Cupertino residents can join eCAP by visiting <http://groups.yahoo.com/group/cupertinoECAP/>

- Community alert messages will indicate the type of crime; the street name; day, date, and time elements; and a brief description of the method used by the suspect(s). It may also include a request for assistance to identify suspicious persons or vehicles that may be associated with the crime.
- All personal information obtained from program participants is kept confidential. It will not be used for political or personal use.
