History of the Cupertino Veterans Memorial
Presented by Sandra James
Tuesday, November 26, 2013, 6:30 pm, Quinlan Community Center, Cupertino Room
How the Cupertino Community came together to honor Matthew Axelson, the son of Donna and Corky Axelson, who gave his life in the summer of 2005 as a Navy SEAL fighting in Afghanistan. A simple request made by Matthew’s high school classmate Tony Banderman to the Cupertino City Council urging a plaque be established to honor Matthew became a major project involving many Cupertino citizens and local firms working to build a Memorial in honor of Matthew and all Veterans as well as Active Duty Military. This is the story behind the creation of the Cupertino Veterans Memorial and how it has enhanced the celebration of Veterans Day in Cupertino ever since its dedication in 2007. For more information on Cupertino Veterans Memorial please visit: cupertinoveteransmemorial.org

Sandra James has served on the School Board for several years and then as a Cupertino City Council Member, and twice Mayor, over the years. Her reputation as a “can do” person was instrumental in bringing the Cupertino Veterans Memorial to the City.
City Commission, continued from page 1

Would You Like To Serve on a City Commission?

Cupertino residents are encouraged to apply for positions on City commissions that will have vacancies in January 2014. For more details, please visit the website or call the City Clerk’s Office at 408.777.3223.
Fire Extinguishers for the Home

Determing which fire extinguisher to have in your home can be a difficult task. There are many different types and sizes available. The most versatile model extinguisher for home use is a type ABC dry chemical extinguisher and should have a capacity of 6 - 10 pounds. The ABC stands for the types of fires it can be used on. A type ‘A’ fire is that of common combustibles such as wood and paper, a type ‘B’ fire is chemicals such as oil, grease or gasoline; a type ‘C’ fire is electrical, such as a computer, electric appliance, or electrical outlet. Remember to never use water on a type ‘C’ fire, the risk of electrical shock is too great. An ABC fire extinguisher can be used on all three types of fires. It is best to purchase more than one for the home, one for every level and one for the garage or workshop, Place the extinguisher in an easy to get at location near to, but not at, the most likely sources of fires. Most hardware, home repair stores and department stores carry one or more types and sizes of fire extinguishers. Once a month check your extinguisher to make sure the gauge is in the green zone and give it a quick shake to keep the dry chemical inside it loose.

Just having a fire extinguisher in your home is not enough. You need to know how to use it properly. The first thing to remember is that a fire extinguisher is for small fires. Never try to put out a fire that has grown larger than a small wastebasket. If there is a fire in your home, always call 911 first, then try to put out the fire with your fire extinguisher and then only if it is smaller than the garbage can. Before using a fire extinguisher, always make sure you give yourself a safe exit out if the extinguisher does not work and never try to use any extinguisher if it will put you in danger from toxic smoke.

Now that you know, when to use a fire extinguisher, you have to learn how to use a fire extinguisher. All fire extinguishers have a tank to hold the extinguishing agent, a nozzle with or without a hose, a squeeze trigger handle, and a safety locking pin. When using the fire extinguisher always remember the ‘PASS’ system: Pull, Aim, Squeeze, Sweep. First ‘Pull’ the safety locking pin. You may have to twist it first to break any plastic retaining strap. Next, ‘Aim’ the nozzle at the base of the fire. Third, ‘Squeeze’ the trigger to start the flow of extinguishing agent, and fourth, ‘Sweep’ at the full base of the fire, not the flames. Operate the extinguisher from a safe distance, several feet away, and then move towards the fire once it starts to diminish. Remember you only have 10 to 20 seconds to put out the fire. If the fire does not go out, exit the house; do not every go look for another fire extinguisher. The risk is not worth your life! It is strongly recommended you attend a class by a qualified instructor on how to use a fire extinguisher.

A Free Safety Class Can Help Save Your Life

Schedule yourself and your family to take a safety class before the end of the year. You’ll feel safer going into the new year.

Simply Safe is a monthly article to inform the community about emergency preparedness, training schedules and volunteer opportunities.
‘Tis the Thanksgiving season - that wonderful American holiday, rich in history from the earliest days of our country. The season recalls those who landed on these shores from afar and those who helped them survive the brutal weather and wilderness by showing them how to plant crops, fish and hunt. The story of America’s first Thanksgiving gathering of settlers and Native Americans deserves remembrance.

In thinking about the rich history of the season, bountifully laden tables and family gatherings are warm memories. For those newly arrived to America nowadays from distant lands, turkey may not be on the table, but there is one item that usually finds itself incorporated into most menus in one form or another... that wonderful, yellow accompaniment to many dishes... butter. Now in the “olden days” - in our household anyway, we received real butter only at holidays or maybe sometimes when company came for Sunday dinner. The rest of the time, margarine was on the table. During, and for some time after the war years, (in the 1940’s) margarine was a white, unappetizing glob. Mother would hand us kids a packet of coloring to mix into the glob......and voila! Fake butter!

In even earlier days, most farm families had a cow or some goats for milk and part of the cow’s milk got churned into butter and buttermilk. I have no recollection of goat’s milk being made into butter, but perhaps an old-timer can inform me about that. In the first grade, at the old Cupertino Union grammar school (where the Cupertino fire station sits now) one of the parents (a Mr. Broughten on McClellan Road) brought a wooden butter churn and a few gallons of fresh milk to our classroom and all the children took turns pushing the churning paddle, until finally we had enough butter for each of us to spread on a saltine cracker. There was a little bit left over and the teacher said that whoever was extra good and quiet all day would get an extra cracker and butter. Yours truly was a veritable mouse the rest of the day and enjoyed a second helping. It tasted heavenly! I recall a story about a woman who somehow came into a huge amount of fresh cow’s milk and despairing over how to use it all. The family had just purchased an agitator washer and was one of the few families with electricity. She dumped about 40 gallons of milk into the washer and agitated enough butter for herself and most of the neighbors. The buttermilk went to the hogs. Very enterprising farm wife.

Putting butter into mold or presses was one of America’s earliest forms of folk art. Butter molds date from around 1650 A.D. and were often designed to show the European heritage of the family who used them. Many early patterns also had a symbolism attached to them, such as the Scottish thistle, which is symbolic of endurance and hardiness. Some other patterns that have been reproduced over the years include:

| (Representing) |  |
|----------------|  |
| Eagle          | Aspirations |
| Rose           | Beauty and glory |
| Shamrock       | Luck |
| Swan           | Vigilance and bravery |
| Acorn          | Expansion, dependability |
| Wheat          | Abundance |
| Heart          | Love, affection |
| Pelican        | Generosity, sacrifice |
| Anchor         | Security, trust |

Early American cooks prided themselves on turning out a fine table, with pats of butter molded into shapes and pressed with family heritage designs. So for those modern cooks, who wish to incorporate a bit of early Americana into their Thanksgiving celebration, find yourself a butter mold or pattern and have some fun. Candy molds would work as well.

A very happy and blessed Thanksgiving to all in Cupertino!

Thanksgiving Holiday Will Affect Garbage Pickup Dates

Garbage collection scheduled during the Thanksgiving holiday (November 28 and November 29) will be delayed one day. Service normally provided on Thursday will be on Friday and service normally provided on Friday will be provided on Saturday. Recology may be contacted at 408.725.4020.

Moving – Apple E-Waste Collection Facility on Bubb Road

At the end of October, the Apple Recycling Facility moved from its Cupertino location to Sunnyvale. Cupertino residents have two other free options for recycling electronic waste: 1) through WM At Your Door Services (call 800.449.7587 to schedule a free home pick-up); or 2) at Environmental Recycling & Shred It days at De Anza College occurring annually in January, May & October. Additional information about the Apple facility move will be provided next month. For more information on these and other programs, please contact the City’s Environmental Programs staff at 408.777.3354 or environmental@cupertino.org.

Did the Garbage Company Miss a Pickup?

To avoid a missed pickup on garbage day and help prevent littering on your street and in our local creeks, keep garbage, recycling and compost bin lids completely closed when placed at the curb. If bins are overweight the garbage company may not service them and a lid that is not securely closed invites rodents, birds and wind to scatter unsightly debris. Litter that enters the City’s storm drainage system flows directly into local creeks and bay. The City recently fitted 52 inlets with trash capture devices in heavily littered shopping areas to keep debris from entering our creeks. Plastic bags and Styrofoam are hazardous to animal and aquatic life and all debris increases the potential for clogged drainage inlets and flooding. If you have excess garbage or organic material one week, consider setting it out over multiple service weeks or utilize one of Recology’s two FREE on-call pickup services per year. For consistent recycling overages call Recology (408.725.4020) to request a free second recycling bin. Recycling in Cupertino is free!

Are You Sure That’s Garbage?

Three years ago Recology and the City of Cupertino rolled out new recycling, food waste (organics or compost) and household hazardous waste (HHW) collection programs. While many residents use these programs, others are unaware of how to properly dispose of different kinds of waste.

Composting - Food scraps and food-soiled paper can be placed in the yard waste bin to be processed into compost. Collect food scraps and paper items in the kitchen pitcher provided by Recology or use another kitchen container to store the scraps before transferring them to the yard waste cart for weekly collection. To guard against odor, bugs, rodents and overall mess in your yard waste cart, wrap food scraps in a paper bag, newspaper or paper towel before putting them into the bin, and keep the lid closed. Paper products absorb moisture and odor, and are compostable. Please do not place your food waste in a plastic or compostable bag, since they may clog the processing equipment and compostable bags don’t break down sufficiently in the time allowed for our compost process.

Cooking Oil – Place cooking oil in a 1-gallon clear plastic container with a closed screw-top lid, for collection on regularly scheduled service days.

Household Hazardous Waste Collection – Call WM At Your Door Special Collection at 800.449.7587 or visit www.wmatyourdoor.com to make an appointment for residential pickup of household chemicals, cleansers, paint, fertilizers, mercury thermometers, propane tanks, and pool or spa chemicals. Pharmaceuticals cannot legally be collected at this time. Dispose of medication at the West Valley Patrol Sub-Station, 1601 S. De Anza Blvd, Cupertino, 408.868.6600.

Winter Woodburning Tips

Fireplaces and woodstoves are a major source of air pollution during the winter months. Wood fires contribute up to a third of the particulate matter in the air on cold, still nights, causing a special health concern for children, seniors and
Almost Everything can be Recycled or Composted!
On November 15, America Recycles Day, millions of Americans will be reminded of our nation’s precious resources and our personal responsibility as environmental stewards to care for those resources. In the spirit of America Recycles Day consider these tips and share your own tips by emailing environmental@cupertino.org.

Reduce
Avoid buying over-packaged goods, buy in bulk when possible and purchase goods in reusable containers. Plan meals to avoid overbuying and food waste. Buy reusable products instead of disposable counterparts (washable food containers vs. plastic baggies, a lunch box vs. paper bags, a reusable water bottle instead of single-use bottles, cleaning rags instead of paper towels, and washable table ware instead of plastic and polystyrene foam (Styrofoam™).

Reuse
Donate rather than discarding items that are still useable, shop with reusable bags, choose reusable products over disposable ones, reuse garbage liners, and keep a scrap paper tray.

Recycle
Buy recycled-content paper, paper towels, toilet paper, and plastic products Increase recycling efforts at home, school and work. Visit the Countywide Recycling Hotline at www.recyclestuff.org to find places that recycle and reuse. Cupertino offers free mixed recycling, so it’s easy to recycle!

Rethink
Attitude and actions make a big difference. Let’s each do our part. Luckily, almost everything can be recycled or composted in Cupertino! Visit www.recologysouthbay.com for details.

Pesticides and Water Quality
Did you know that whatever flows into the storm drain flows untreated into our creeks and bay? Often, this storm water is contaminated with pesticides that are used for lawns and gardens. Even small amounts of some pesticides may be toxic to our water supplies and aquatic life. Pesticides threaten your health and the health of the watershed, but you can do simple things to help protect water quality:

• Visit www.mywatershed.org to learn about an alternative approach called Integrated Pest Management (IPM). You will find fact sheets that offer effective and least toxic ways to solve specific pest problems.

• Dispose of toxic unused pesticides safely. Never put them in the garbage, or wash them into sinks, toilets, or showers. Cupertino residents may make an appointment for convenient pick-up of unused pesticides by contacting Waste Management (WM) at 800.449.7587 or visiting www.wmatyourdoor.com.

Fall Leaf Collection
As the Fall leaf season approaches, additional efforts are needed to help keep the streets clean and the gutters flowing. Please consider the following as we enjoy this season:

• City streets are normally swept twice a month.

• During heavy leaf fall additional sweeping may occur on your street—the frequency of additional sweeping will depend on the amount of dropped leaves and weather.

• Leaves should not be raked or blown into the street.

• Leaves should not be piled in the street.

• Leaves on private property are to be deposited into your collection container. If you need an additional yard waste bin in a heavy leaf fall area, please contact Recology Customer Service at 408.725.4020 or email your request to the City of Cupertino Environmental Programs at environmental@cupertino.org.

• Leaves may be accumulated for up to one month (if necessary to reasonably fill the collection container), so long as they are not stored within view of the public right-of-way and are kept in appropriate containers.

• Park off the street on your sweeping day and when you observe additional sweeping. Signup for street sweeping notifications at www.cupertino.org/streetsweeping. Please contact the City of Cupertino at 408.777.3269 with any questions.

**Cupertino Symphonic Band Pays a Tribute to Our Veterans**  
**November 10, 3 pm, Quinlan Community Center, 10185 N. Stelling Rd., Cupertino**

Jason McChristian will conduct a program of patriotic tunes, marches and show music with the Cupertino Symphonic Band as a tribute to our veterans. In addition, the CSB Horn Quartet will play a tribute to Jeanne Davies who was a member of the CSB horn section until her passing in the summer.

The concert is free, but donations of canned goods for West Valley Community Services are appreciated. For more information, call 408.262.0471 or visit the website at www.netview.com/csb
**Protected Trees Ordinance**

The Cupertino City Council has directed staff to prepare amendments to Chapter 14.18, Protected Trees, of the Cupertino Municipal Code. The potential amendments include:

- Streamline process for removal of Protected Trees
- Review and update:
  - List of specimen trees
  - Tree replacements
  - Mitigation for tree removals

Associated changes to Chapter 19.12, Administration, may result from these amendments. In accordance with California Environmental Quality Act (CEQA), environmental assessment is currently underway for the proposed amendments.

A community meeting to gather public input has been scheduled for Wednesday, October 30, 2013 at 6:30 pm at Community Hall.

The following public meetings are tentatively scheduled:

- Planning Commission meeting on Tuesday, December 10, 2013 at 6:45 pm
- City Council meeting on Tuesday, January 21, 2014 at 6:45 pm

The current Protected Trees Ordinance can be viewed on the City’s website at [www.cupertino.org/protectedtrees](http://www.cupertino.org/protectedtrees). More information regarding the current amendment is available at the project website at [www.cupertino.org/treeord](http://www.cupertino.org/treeord).

Please note that the meeting dates are tentative. Please check the website ([www.cupertino.org/treeord](http://www.cupertino.org/treeord)) or call 408.777.3308 prior to the meeting for updated information in the event of changes to the schedule or for additional information about the project.
